

SAMUEL RIVIERE READE

+1 (415) - 887 - 8215 ▪ sam5.reade@gmail.com ▪ [Website](#) ▪ [LinkedIn](#) ▪ [GitHub](#)

EDUCATION:

UNIVERSITY OF CALIFORNIA, LOS ANGELES

B.S. in Statistics and Data Science - UCLA

Los Angeles, CA

Sep 2022 - Jun 2026

UNIVERSITY OF CARLOS III, MADRID

Relevant Coursework: *Statistical Learning / Probability and Data Analysis*

Madrid, Spain

Aug 2024 - Dec 2024

PROFESSIONAL EXPERIENCE:

Turner and Townsend (Construction Consulting)

On-site - San Francisco, CA

AI Engineer [Claude / TS / Python / SQL / Azure / Terraform / Docker]

Aug 2026 - Present

- Leveraging AI to drive the next generation of cost managers, building tools that have an impact in the real world

Innovius Capital (Venture Capital)

Remote

Data Science Intern [Python / AWS / Docker]

Jan 2026 - Mar 2026

- Automated a classification pipeline to analyze company websites, determining alignment with investment strategy
- Optimized an LLM and rule-based unsupervised model, achieving 72% precision, 91% recall, and 70% accuracy
- Designed a modular system integrating scraping, text enhancement, classification, and decision logic components
- Deployed and containerized the pipeline on AWS using Batch, ECR, and S3, enabling scalable, data processing
- Implemented automated weekly orchestration with EventBridge, that continuously updates a centralized dataset

Popcorn.co (AI Moviemaking Social Network)

Hybrid - Los Angeles, CA

Data Analytics / Data Engineering Intern [TS / Python / Amplitude]

Jun 2025 - Sep 2025

- Architected and deployed Customer Data Platform, pursuing event-level data that drove platform development
- Built scalable tracking functions across front-end and back-end systems, processing over 600,000 API instances
- Ensured end-to-end data pipeline integrity by locating and resolving discrepancies, establishing robust reliability
- Led cohort, funnel, retention, and conversion analyses to identify drop-off points and successful platform features
- Designed data-driven UI wireframes while collaborating with engineers and product managers for integration

DTEX Systems (Cyber Security - IRM)

Palo Alto, CA

Data Science Intern [Python]

Jun 2024 - Aug 2024

- Engineered anomaly detection algorithms to identify internal bad actors, processing over 10 million data points
- Successfully designed model to produce actionable risky groups, using NLP, and an iterative clustering approach
- Thoroughly preprocessed and cleaned data, essential for multidimensional clustering, and dependable analytics
- Developed an analytical approach, systematically interrogating data quality and assumptions before modeling

PROJECTS:

Investigating Social Media Posts Across Mental Health Categories - [repository](#)

Los Angeles, CA

Introduction to Text Mining [R]

Feb 2026 - Mar 2026

- Built a Random Forest pipeline to classify 7 mental health conditions from 53,000 labeled social media posts
- Refined features for training using unigram and bigram TF-IDF, 3 sentiment lexicons, and LDA topic modeling
- Model achieved 78.1% accuracy and a Cohen's kappa of 0.713, indicating substantial agreement beyond chance

Predicting Extreme Durability of Rolled-Formed Aluminum - [repository](#)

Los Angeles, CA

Statistical Models and Data Mining [Python / R]

Nov 2025 - Dec 2025

- Competed in Kaggle competition by developing probabilistic models to predict aluminum durability for planes
- Implemented CatBoost models using cross-validation and log-loss optimization on a dataset of 160,000 records
- Conducted EDA and feature engineering, uncovering underlying patterns, achieving average logistic cost of 0.42

EXTRACURRICULAR ACTIVITIES:

UCLA Rugby

Los Angeles, CA

Wing / Scrumhalf / Fullback

Sep 2022 – Present

- Captain of the DI 7s rugby team; fostered a competitive, high-performance culture that pushed teammates to excel
- Served as the primary link between coaching staff and players, translating game plans into on-field execution

SKILLS and INTERESTS:

Skills: Python, TypeScript, R, SQL, AWS, HTML, Docker, LLM SDKs, NLP, Regex, github, Tableau, Amplitude, OOP

Interests: History, Traveling, One Piece, Skiing, Reading, LEGO, Film, SF Giants, 49ers, Nature, Stellar masses, Archery
